

Welcome address by Director of Agriculture and Farmers Welfare

I feel immensely privileged to welcome you all on the trial launch of the Website on ground water resources regulation by the Govt.of Puducherry in the name & style of **www.pgwa.py.gov.in**

The importance of water as an invaluable natural resource is being highlighted by the natural hazards that are witnessed throughout the work, which only emphasize the judicious use of the precious resource.

Regulating the usage of ground water resources by various sectors through intensive monitoring is imperative to avoid wastage and misuse of the natural resource, for which, the Govt.of Puducherry has initiated the first step to launch a website through Puducherry Ground Water Authority, for effective usage by the users and the planners alike.

Kindly visit the website and register yourself and provide us with your valuable suggestions in the areas that need improvements, if any.
